

Barrel Clamps

Barrel Clamp - Known as "Barrel Clamp", this hydraulic accessory is utilized on lift trucks so as to compress objects that you would like to transfer with the lift truck. Typically, they are used in order to paper rolls, barrels, and handle kegs, together with some barrel clamp designs being able to rotate the cargo. Like for instance, the rotate function permits a forklift operator to be able to insert a vertically stored paper inside the horizontal intake of a printing press.
