

Forklift Electrical Parts

Electrical Part for Forklifts - Forklifts could be specifically marked to be used in dangerous locations. A labeled forklift indicates the design has met the minimum standards of ANSI/UL 558 for engine powered forklifts or ANSI/UL 583 meant for electric trucks for the type of label placed.

The use for labels for lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance provider and Fire Marshall for further information about the permitted uses of industrial powered lift trucks in your application.

If the forklift has been found to meet the outlined standards, the following labels could be placed. A marked truck will have the type description located on the forklift nameplate and would have one of the following labels attached.
